## **(2016 – 2017)**

**Name of the District: West Sikkim**

**Telephone Number :** 1. DC Office: 03595-250888 (O)  
03595-250730 (Fax)  
2. DEOC : 03595-250633

## WHY IT IS IMPORTANT

The District Disaster Management Plan is inevitable. There is no doubt about its formulation, vow for preparedness and commitment for its positive implementation at the hour of crisis. The plan is viable because it envisages the following factors critically from a practical point of view:

- Risk assessment & Vulnerability analysis.
- Establishing a culture of quick and effective response.
- Maintaining cohesiveness & uniformity in the formulation of a strategy taking a wide range of heterogeneous factors posed by a disaster.

## OBJECTIVES

An effective and realistic District Disaster Management Plan is one with fool-proof communication, authentic and accurate data base, documented and rehearsed to be activated in the shortest possible time with minimum simple orders and procedures ensuring active participation both by Government, Community and Volunteers at all levels. It makes optimum utilization of men, material and available resources with no gaps or no overlaps to prevent loss of lives and minimize loss to property ensuring fastest response for rescue, rehabilitation and to avert further miseries of the calamity stricken people. There is a saying that a friend in need is a friend indeed. The DDMP like a true friend will obviously guide the entire machinery engaged for relief operation and instill courage among the community to face the eventuality boldly.

## TYPES OF DISASTERS

A disaster is a serious disruption of the functioning of a community or a society involving widespread human, material, economic or environmental losses and impacts, which exceeds the ability of the affected community or society to cope using its own resources. Disasters are often described as a result of the combination of: the exposure to a hazard; the conditions of vulnerability that are present; and insufficient capacity or measures to reduce or cope with the potential negative consequences. Disaster impacts may include loss of life, injury, disease and other negative effects on human physical, mental and social well-being, together with damage to property, destruction of assets, loss of services, social and economic disruption and environmental degradation.

### □ Types of Disasters: (Experienced in the District)

Common Natural Disasters	Man Made disasters
Earthquake	Fire – House /Forest
High Speed wind	Communal riot
Flash Flood	Accident – Road
Landslide	Epidemics
Hailstorm /whirl wind	
Lightening/Thunderstorm	
Drought	

**Overview of the District:** West Sikkim district is located in the western part of the state of Sikkim with Gyalshing as the district headquarters. West district is the third largest populated district next to East and South Sikkim. The total area of the district is 1,166 Sq. Km. and the total population as per 2011 census is 1,36,435 out of which 70,238 are males and 66,197 females. Gyalshing, Dentam, Soreng & Yuksom are the four Sub-Divisions of the district.

The entire state of Sikkim lies under seismic zone- IV, which is known as very high risk zone. West Sikkim being a district with hilly terrain and fragile landscape, it is mostly affected by landslides, high speed winds, drought, forest fire & hailstorms. Every year there are reports received by the District Administration on damages caused to crops due to heavy rainfall or hailstorm. In addition to this, the administration also receives reports on house damages due to high speed winds, fire and landslide. The traditional housing structures called EKRA structure made from mud and stones especially in rural areas though are not resistant to earthquakes, but it has been observed that these old wooden houses can survive during an earthquake more easily than buildings made from modern concrete materials and also cause less damage and loss of life to their inmates in times of earthquakes. However, they are quick to get damaged in case of fire accidents.

### **WHO FORMULATES & CARRIES OUT THE PLAN & WHEN – DDMC**

The West District Disaster Management Committee (WDDMC) has been formed in West Sikkim under the Chairmanship of the District Collector to evaluate the disaster preparedness for different types of calamities that may occur at different times over the year. The mandate of the Committee includes taking stock of any disaster situation, monitor routine preparedness, suggest improvements in the response mechanism, measures of disaster risk reduction and develop a document for disaster management in the District.

The composition of the WDDMC is as follows:
