

**SIKKIM RATTLED!** A 5.4 Richter Scale with its epicentre in East Sikkim and Bhutan border rattled Sikkim and neighbouring Darjeeling hills at 8:50 pm of Monday. The intensity and tremors lasting for some 5 seconds were enough to send people in most parts of Sikkim out of their homes. Seen in the photo are people in Rangpo out on the street following the earthquake. No damage to property or human casualties has been reported so far.
